

High quality compost tea requires extensive testing of the tea brewing equipment as well as the nutrients used to feed microbial populations through the brewing cycle. We have devoted a tremendous amount of time and energy to produce the best compost tea on the market.

Because of the enormous number of possibilities of microbial foods we are dedicated to continue our testing. Here you will find some of our test results.

	Active Bacterial Biomass	Total Bacterial Biomass	Active Fungal Biomass	Total Fungal Biomass
<b><u>Earth Tea Brewer 500</u></b>	72	4838	7.60	12.08
	135	6054	4.03	4.03
	835	5952	19.6	61.9
	84.5	4288	13.5	21.5
Desired Range	10-150	150-300	2-10	2-20

	Active Bacterial Biomass	Total Bacterial Biomass	Active Fungal Biomass	Total Fungal Biomass
<b><u>Earth Tea Brewer 100</u></b>	240	6016	6.15	25.4
	448	4723	3.88	10.57
	540	13504	7.60	19.8
	132	9856	7.27	22.1
Desired Range	10-150	150-300	2-10	2-20

	Active Bacterial Biomass	Total Bacterial Biomass	Active Fungal Biomass	Total Fungal Biomass
<b><u>Earth Tea Brewer 22</u></b>	1510	11392	12.7	24.1
	338	10688	7.33	21.5
	484	22336	5.78	25.6
	658	14464	8.72	21.3
Desired Range	10-150	150-300	2-10	2-20
